

Ramirez Facial Rejuvenation, Anatomy:

LECTURES: FOREHEAD AND UPPER EYELID | JULY 30-31, 2026

1. Endoscopic Forehead/Brow Lift vs Remodeling:
 - A) Anatomy, Aesthetics, Basic Principles, Step by Step
 - B) Safe Corrugator, Procerus Manipulation. How to decrease risk of paresthesias
 - C) Forehead Fixation Techniques
 - D) How to obtain the “Westmore” brow
 - E) Brow, glabella, forehead and temple volumizing with structural and partially micronized fat
2. Trans-Blepharoplasty Brow and Forehead Rejuvenation
3. Treatment of the Ectopic ROOF
4. Endoscopic Assisted Biplanar Brow/Glabellar Rejuvenation and Forehead Shortening
5. Glabella, Superior Orbital Rim Implant (SORI) and Temple Implants
6. The Xtended Endoforehead and Peri-orbitoplasty Treatment of the Crow’s feet from a distant approach
7. Reassessment of the Fassanella-Servat Ptosis Repair
8. The Sliding Conjoint Fascia for Subclinical Eyelid Ptosis
9. Mini-invasive and open upper Blepharoplasty
10. Temple lift. Endo and Semi-open
11. How to create the “Cat eye”
12. Role of Laser Resurfacing in forehead and peri-orbital rejuvenation
13. Morpheous, Microneedling and Nanofat for Skin wrinkling
14. Preoperative and postoperative management
15. How to treat complications

Ramirez Facial Rejuvenation, Anatomy:

LECTURES: MIDFACE, LOWER EYELID, ORBITAL RIM,
PYRIFORMIS, UPPER LIP, NOSE | JULY 30-31, 2026

1. Endoscopic Midface Lift vs Remodeling: Anatomy, Aesthetics, Basic Principles, Step by Step
2. Endoforehead-Endomidface
3. Endotemporo-Midface
4. Intra-oral Midface Lift
5. Suspension Methods of the Midface
6. How to create the Midface Ogee
7. The role of the Bichat's Fat Pad in Rejuvenation and Beautification
8. How to eliminate the V deformity of the lower orbit with the Vertical SOOF lift
9. Several methods of Muscle Sparing Lower Blepharoplasty
10. Canthopexy and Canthoplasty Methods
11. Direct Myectomy for Treatment of Crow's feet
12. How to prevent and treat Lower eyelid Retraction
13. Facial Implants: Lower Orbital Rim Implants (LORI), Tear through implants, Malar implants, Pyriformis Grafts vs. implants
14. Scarless Facial Beautification and Rejuvenation
15. Role of Rhinoplasty in Beautification and Rejuvenation
16. How to create "almond shape" eyes
17. Multiplane and Multidimensional Fat Grafting: structure, shaping, volume, skin quality
18. Upper Lip Lift. Corner Lift
19. Rejuvenation of Facial Expression: The ultimate frontier
20. Role of Laser Resurfacing, Morpheus, Microneedling, Nanofat
21. Laser resurfacing: Rx of brown spots, wrinkles and sun damage skin
22. Preoperative and postoperative management
23. How to treat complications

Ramirez Facial Rejuvenation Anatomy:

LOWER FACE, LOWER LIP, MANDIBLE, NECK, CHIN, EARS
SEPTEMBER 17-20, 2026

1. Anatomy, Aesthetics, Basic Principles of Face, Neck, Chin, Mandible, Lower lip
2. Indications and limitations for procedures without skin excision. Suture Suspension Methods. Role of the Quantum Bipolar Radiofrequency Energy. Morpheus Radio- frequency
3. Endoscopic assisted , “scarless”cervicoplasty (without skin excision)
4. Anterior Approach, Superficial and Deep Cervicoplasty
5. Bidirectional Cervicoplasty with Retro-auricular skin excision
6. The Deep Plane vs. the DEEPER Plane “Facelift”. Comparison of techniques and Results
7. The super-extended Cervicofacial Lift with release of the Perioral Circular line of fibrous adhesion
8. How to treat the JOWL and prevention of the “Swoosh- Nike Deformity”
9. Deep Subplatysmal Cervicoplasty: technique, step by step: Deep fat excision, Digastric Plication, Salivary Gland Excision
10. Prevention of Sialoma after Submandibular Salivary Gland Excision
11. Augmentation of Chin, Ramus and Angles with the “Mandibular Matrix Implant System” Single Incision Endoscopic Approach
12. Tridimensional Wraparound Chin implant, an ideal substitute to Sliding Genioplasty
13. Other implant shapes. Indications
14. Mentopexy: an algorithmic approach for the treatment of chin Ptosis and the witch’s chin

Ramirez Facial Rejuvenation Anatomy:

LOWER FACE, LOWER LIP, MANDIBLE, NECK, CHIN, EARS

SEPTEMBER 17-20, 2026

15. Lower lip and chin Lift for the aging mouth
16. Is the “Pseudoparalysis of the Lower Lip” a real or misconceptualized entity?
17. Suture suspension Cervicoplasty
18. How to prevent infero-medial axis rotation of the ear during facelift
19. Creation of the Natural Pretragal depression during facelift
20. Pretragal vs. “Retrtragal” Incision. Comparative analysis
21. Omega vs. Z incision in excisional facelift
22. How to make the periauricular incisions the most inconspicuous possible
23. Earlobe Reduction
24. How to treat Parotid gland bulging
25. SMAS or not to SMAS
26. Role of Hemostatic Net
27. Complex Anatomy of Jowl. How to approach it
28. Nerve injuries. How to repair it
29. Laringo-chondroplasty
30. How to treat the damaged “décolleté”
31. Pre, peri and postoperative management
32. Complications and management
